Course Description

Have you practiced your emergency response skills relative to these conditions? Do you have the tools available to simulate these conditions for your students and colleagues? Want to refresh your own knowledge of these EAP procedures? Come to the Skills Lab Primer and sign up for a time to practice in these 4 stations. Lab instructors will be available to assist with each station and lead participants through glucometer testing, insulin and glucagon injection; metered dose inhaler, spacers, nebulizers, peak flow meter use and asthma zone calculations; epinephrine auto injectors and oxygen administration; and naloxone administration and airway management for opioid overdose. Skills stations available for practice, refinement and continuing education.

- **Heat Illness** - Using a task trainer, clinicians will be able to assess their knowledge and ability and practice the skills needed to assess core body temperature by inserting a flexible probe rectal thermometer necessary for ice immersion treatment and rapid reading semi-rigid thermometer.
- **Heart and Lung Sounds** - Using a mannequin and vital signs simulator, clinicians will be able to assess their knowledge and ability and practice the skills needed to detect normal and abnormal sounds using a stethoscope.
- **Eye, Ear, Nose and Throat Physical Examination** - Using task trainers and lab assistants, clinicians will be able to assess their knowledge and ability and practice the skills needed to conduct a physical examination of the eye, the ear, nose and throat using high and low cost ophthalmoscope/otoscope tools.
- **Basic Life Support** - Using task trainers, clinicians will be able to assess their knowledge and ability to establish an airway using OPA, NPA, and supraglottal airway adjuncts; administer supplemental oxygen via cannula, non-rebreather masks, and bag valve masks; and provide chest compressions at the recommended rate and depth.

- **Managing Hemorrhage** - Tourniquets, hemostatic agents, and suture practice pads.

Lab assistants will be available to guide participants in self-directed skills practice, multi-media resources will be available for review and instruction, and cost estimates and vendor supplies lists will be available for participants to support purchasing decisions for AT clinical settings.

Call for Presentation Proposals for the 2021 GLATA Annual Meeting and Symposium

March 10-13, 2021
Wheeling, IL

The Great Lakes Athletic Trainers' Association Education Committee is inviting proposals for professional presentations at the 2021 Annual Meeting and Symposium in Wheeling, IL, March 10-13, 2021. Athletic Trainers and affiliated professionals are encouraged to submit proposals for both general sessions and those that may qualify for the BOC's Evidence-based Practice (EBP) continuing education units (CEUs). Presentation formats for all sessions include: feature presentations, learning labs and mini-courses. Further descriptions and guidelines for both types of proposals are posted on the GLATA website under the Annual Meeting tab.

Presentation topics should address athletic training domain(s) beyond entry-level knowledge or address a topic that would make a valuable contribution to the understanding of the practice or pedagogy of athletic training. EBP foundational presentations should enhance the athletic trainer's understanding and implementation of EBP, while EBP clinical presentation should address the presentation topic using the best available evidence. In addition, if one's EBP presentation proposal is accepted by the GLATA, the author(s) must work with the GLATA Education Committee in securing BOC EBP course approval.

Individuals interested in presenting must complete the online application indicating the presentation type, learning objectives, and resources needed as well as a structured abstract (250 word limit; see website for format). Please note there is a specific application and proposal format for an EBP presentation. All proposals must be submitted electronically through the GLATA website [www.glata.org]. Mailed or faxed submissions will not be considered. Please contact Jessica Emlich Jochum, GLATA Education Committee Chair (jochumj@uindy.edu) regarding any questions. Each submission will undergo review by the GLATA Education Committee.

Submissions must be received by **May 1, 2020** for consideration.

	Length	# of Speakers	Format
Feature Presentation	1 hr	1-2 Speakers	Lecture only
Learning Lab	2 hrs total	1-2 Speakers + lab assistants	Lecture and lab combination
Mini-Courses	2-6 hrs pre/post conference (attendees register for additional CEUs)	1-2 Speakers + lab assistants	Speaker's choice of lecture, lab or combination
